

3D-P Australia Honored with LAN-1 Motorola WNS & Cambium Networks Outstanding Channel Partner of the Year Award

Mal Jones, Manager of Australia Pacific Region accepts the award for 3D-P

Calgary, Alberta, Canada – March 7, 2012: LAN-1, value-added distributor of Motorola Wireless Network Solutions and Cambium Networks, awarded 3D-P Australia channel partner of 2011. The award recognizes the outstanding performance and overall excellence of 3D-P Australia.

“The award was given to our most valuable outdoor wireless partner in 2011, which is 3D-P Australia for their continued support and commitment with LAN-1. We are hoping this year to grow the business stronger, and that 3D-P Australia will win the award again,” said Justin Kumulia, Lan-1 Channel Account Manager.

“I am honored to accept the award, and look forward to a strong relationship with LAN-1 and Motorola in the years ahead,” commented Mal Jones. “3D-P focuses on customer-driven solutions and has been a leader in mining technology in Australia, as well across the globe.”

About 3D-P

3D-P was formed in 1996 with a goal of bringing world-class technologies to mining and the natural resource industry. The company’s products increase productivity and decrease costs through the implementation of technology that is proven, reliable and cost effective.

The team of experts includes Mining Engineers, Electrical Engineers, Telecommunications Engineers, Consultants and Software Engineers that have decades of experience in the Natural Resource industry developing advanced technology systems. The company brings that experience to work every day solving mobile application and wireless network problems. Visit the new web site at www.3d-p.com. For technical solutions visit globalminingsolutions.wordpress.com, and follow @3DPMining on Twitter.
