

3D-P Expands to Meet Demands of Global Growth Sales and Support Workforce to Increase by 20% over the Next Few Months

Calgary, Alberta, Canada – April 9, 2012: 3D-P, the leading resource for technologically-advanced onboard open-sourced computing platforms and wireless networks, announced today that they are ramping up personnel in key global locations.

“Rapid expansion as well as another significant global agreement with a major mining company is allowing us to increase our sales and support staff,” said Al Lehman, President and CEO of 3D-P. “As always, our motivation is to provide exceptional customer service, and increasing customer support staff will allow us to continue and exceed the service our customers have come to expect,” Lehman continues. “3D-P’s phenomenal growth is running with projections for 2012, and as the industry grows, we are laying the groundwork for not only geographic but product expansion to meet the future needs of the mining industry.”

About 3D-P

Since 1996, 3D-P was brought customer-driven solutions and world-class technologies to mining and natural resource industries. 3D-P products increase productivity and decrease costs through the implementation of technology that is proven, reliable and cost effective.

3D-P’s team of experts includes Mining Engineers, Electrical Engineers, Telecommunications Engineers, Consultants and Software Engineers that have decades of experience developing advanced technology systems. They bring that experience to work every day solving mobile application and wireless network challenges. Visit online to learn more <http://www.3D-P.com>.
