

3D-P and Communications International Sign Global Partnership Agreement

The pairing of two global technology corporations expands product and distribution offerings.

Calgary, Alberta, Canada – July 3, 2012: 3D-P and Communications International, both leaders in communications technology solutions for the resource industry, announced today a partnership whereby Communications International will become 3D-P's exclusive distribution partner in Asia, Africa, Europe and parts of South America. This will enable 3D-P to deploy its solutions anywhere in the world.

The distribution partnership underscores 3D-P's commitment to global expansion while maintaining value-added customer service and follows Communications International's mission to create long-term relationships that deliver great outcomes for clients and team members.

"We are excited about our relationship with the Communications International group," stated Sean McClary, VP of Sales and Marketing, 3D-P. "They are a strong company with an expanding global presence. This relationship will allow 3D-P to enter new territories, as well as provide products and technology solutions to new vertical markets."

Communications International is a sister company of Communications Australia, which has been integrating and maintaining communications solutions for a range of different industries for almost two decades.

"The partnership with 3D-P enhances our offerings as a solution provider to our clients as 3D-P provides us with a proven, open-source, rugged and technologically-advanced onboard computing platform and wireless networking solution that allows us to enable different technology options for our clients in harsh and challenging environments," stated Wayne Bos, Chairman of Communications International.

About 3D-P

Formed in 1996, 3D-P is headquartered in Calgary, Alberta Canada with offices in the United States, Australia, and South America. The company is an innovator of customer-driven, technology-advanced solutions for the mining industry, providing middleware that connects mines with operations and people. 3D-P's field-proven solutions are deployed at the largest

mining companies on every continent in the world. Visit <http://www.3D-P.com> to learn more.
