

## **3D-P Announces Two New Service Hires in Australia**

### **To Aid in Expansion and Fill Key Customer Service roles in this Growing Territory**

**Calgary, Alberta, Canada – November 12, 2012:** 3D-P, the leading resource for technologically-advanced open networking and computing platforms in the mining industry, announced today that Darren Young and Kade Edwards have joined the Australian Service Team.

"As 3D-P's footprint grows larger across this expanding territory, we are honoring our ongoing commitment to provide excellent customer service throughout the life of a project and to maintain 24/7 customer support," said Sean McClary, Vice President of Global Sales and Marketing. "With the phenomenal expansion of 3D-P's deployments in Australia, we are fulfilling our commitment to exceed customer service expectations."

Darren Young brings with him many years of experience as a technician in the Australian Army, and more recently, mining experience at Mine Site Technologies and Newmont at the Jundee Gold Mine. In addition, Darren has significant experience in civil security operations. Kade Edwards also brings with him many years of experience as a technician in the Australian Navy, and most recently mining, oil & gas and construction experience at Kentz Barrow Island and Rio Tinto.

"This has been quite a year for 3D-P," commented Mal Jones, 3D-P's Manager for the Asia Pacific Region. "As our business has grown we have kept our commitment to our customers, and have been successful in hiring knowledgeable support personnel who can hit the ground running. We are very comfortable with the skill level of both Darren and Kade, and welcome them onboard."

### **About 3D-P**

Formed in 1996, 3D-P is the innovator of customer-driven, technology-advanced solutions for the mining industry. The company provides middleware, which connects mines with operations and people. The Intelligent Endpoint™ products are vendor agnostic and work with any hardware, applications and wireless networks. This allows mines to take advantage of the best applications and wireless technologies without having to do entire forklift upgrades to equipment and networks. With global offices staffed with engineering experts, 3D-P's field-proven solutions are deployed at the largest mining companies on every continent in the world. Customers have proven that 3D-P's Intelligent Endpoint™ products increase production while decreasing costs. 3D-P is Technology :: Connected. Visit <http://www.3D-P.com>.
