

## **3D-P Announces Move to New Facility in Calgary, Alberta, Canada**

**New facility expected to be completed by January 31, 2012**

**Calgary, Alberta, Canada – January 1, 2012:** 3D-P a leader in mining technology solutions announced today they are consolidating global operations to a newly built 18,000 square-foot facility after the first of the year.

With additional space the new building located at 8 Manning Close NE in Calgary will support 3D-P's strategic objectives to expand product lines, maintain superior customer support, and create operational efficiencies to meet an expanding global market.

“We are looking forward to consolidating our operations under one ‘best in class’ facility. This will enable 3D-P to better serve our global customer base and provide ample infrastructure for our aggressive growth plans,” said Paul Spadafore, COO.

### **About 3D-P**

3D-P was formed in 1996 with a goal of bringing world-class technologies to mining and the natural resource industry. Our products increase productivity and decrease costs through the implementation of technology that is proven, reliable and cost effective.

Our team of experts includes Mining Engineers, Electrical Engineers, Telecommunications Engineers, Consultants and Software Engineers that have decades of experience in the Natural Resource industry developing advanced technology systems. We bring that experience to work every day solving your mobile application and wireless network problems. Visit us online to learn more <http://www.3D-P.com>.
