

3D-P Announces New Field Service Position in South America

To Aid in Expansion and Fill Key Customer Service Role in This Growing Territory, Oscar Ramos joins 3D-P as Field Support Representative II.

Calgary, Alberta, Canada – July 16, 2012: 3D-P, the leading resource for technologically-advanced open networking and computing platforms in the mining industry, announced today that Oscar Ramos of Arequipa, Peru will be joining them as Field Support Representative II.

"Oscar Ramos is a seasoned electronics engineer with over 14 years of mining experience including five years with Modular Mining," said Ron White, 3D-P's VP of Technology. "He brings with him a wealth of knowledge, and he is an excellent addition to the Support Group."

Mr. Ramos' primary responsibilities will include product training and support, installation services, and assisting customers with optimization of the 3D-P product line.

"3D-P has been rapidly expanding operations in South America," said Hugo Untiveros, Regional Sales Manager of South and Latin America "We are fortunate to have Oscar Ramos help us meet the growing need for customer service in that region."

About 3D-P

Formed in 1996, 3D-P is headquartered in Calgary, Alberta Canada with offices in the United States, Australia, and South America. The company is an innovator of customer-driven, technology-advanced solutions for the mining industry, providing middleware that connects mines with operations and people. 3D-P's field-proven solutions are deployed at the largest mining companies on every continent in the world.
