

3D-P Announces Resell Agreement with Three Wire Systems

IT Business in Virginia to resell 3D-P product to U.S. Federal Government

Calgary, Alberta, Canada – March 13, 2013: 3D-P, the leading resource for technologically-advanced, ruggedized networking and computing platforms has signed a resell agreement with Three Wire Systems, LLC (Three Wire). 3D-P products are proven in tough mining environments, and now through Three Wire will be sold to connect military vehicles traveling through tough and rugged terrain.

"Three Wire Systems' knowledge of technology, integrations and infrastructure within the U.S. Federal Government provided easy to recognize synergies with 3D-P's offerings" commented Sean Wilson, Director of Global Business Development with 3D-P. "This is a great opportunity for both organizations. It expands Three Wire's solution offering and 3D-P's footprint by adding a new industry in need of a rugged computing platform."

Federal Government initiatives such as the Common Hardware Systems-4 (CHS-4) opened the door for partnership opportunities between IT Solution providers and Commercial Off The Shelf (COTS) manufacturers. "By combining Three Wire's innovative IT solutions with 3D-P's ruggedized computing platform, we are providing a future-proof solution that meets the demands of any military or Federal Government deployment," said Wilson.

Three Wire Systems' Federal solution set includes reduced telecommunication spend, effective IT asset management, identification of un-deployed/underutilized software assets, and reduced power consumption. Three Wire works directly with the Department of Defense, including Army and Air Force, Homeland Security, Nuclear Regulatory Commission, U.S. Senate and Congress, to name a few.

"We're thrilled to offer 3D-P's product to the Federal marketplace," states Three Wire CEO Dan Frank. "Three Wire is the leader in eliminating wasteful spend by deploying disruptive technologies, and 3D-P's solutions enhance our offerings."

About 3D-P

Formed in 1996, 3D-P is the innovator of customer-driven, technology-advanced solutions for the mining industry. The company provides middleware, which connects mines with operations and people. The Intelligent Endpoint™ products are vendor agnostic and work with any hardware, applications and wireless networks. This allows mines to take advantage of the best applications and wireless technologies without having to do entire forklift upgrades to equipment and networks. With global offices staffed with engineering experts, 3D-P's field-proven

solutions are deployed at the largest mining companies on every continent in the world. Customers have proven that 3D-P's Intelligent Endpoint™ products increase production while decreasing costs. 3D-P is Technology :: Connected. Visit <http://www.3D-P.com>.

About Three Wire Solutions

Three Wire Systems LLC - a service-disabled, veteran owned small business – is a dynamic and multi-faceted IT consulting and solutions firm founded in 2006. We eliminate wasteful spend in Federal Enterprise environments through the introduction of disruptive technologies. Particular areas of focus include reduced telecommunication spend, effective IT asset management, identification of un-deployed/underutilized software assets, and reduced power consumption. Professional services capabilities include project and program management, enterprise server and active directory support, and web application development. Our engineering expertise is centered on the IT infrastructure - compute, storage, networking, and cyber security. For more information, visit www.threewiresys.com.
